**TESTIMONIAL FOR Javian Ng**

To Whom It May Concern,

I'm writing with great pleasure to recommend Javian for the NOC programme offered by NUS. I believe that he possesses the attributes that will be relevant to your programme, which would be an ideal environment in which he can further his growth.

During Javian's tenure at LFG, his passion for software development and his determination to excel in his role was evident to all. His enthusiasm for learning and their ability to adapt to new challenges made them an asset to our development team. He consistently demonstrated a strong work ethic, a thirst for knowledge, and a genuine interest in the travel industry.

Beyond his technical skills, Javian displayed a keen eye for opportunities. He often came up with creative solutions to complex problems and demonstrated an entrepreneurial mindset by offering suggestions for potential product enhancements. His ability to think beyond the code and understand the broader business implications of their work is a valuable trait that bodes well for their future in the tech industry.

Javian was always proactive in seeking feedback and guidance, and he was always open to collaboration with team members. His ability to work harmoniously with colleagues of diverse backgrounds and experience levels enriched our team's dynamics and productivity.

Best regards,
